Custom Built to Your Design

The hydraulic landing gear ▶
operates remotely and is
available on fifth wheel and
gooseneck models.

The optional auto
stacker system, ▶
shown with the
second level in
position, allows
multiple car
transport.

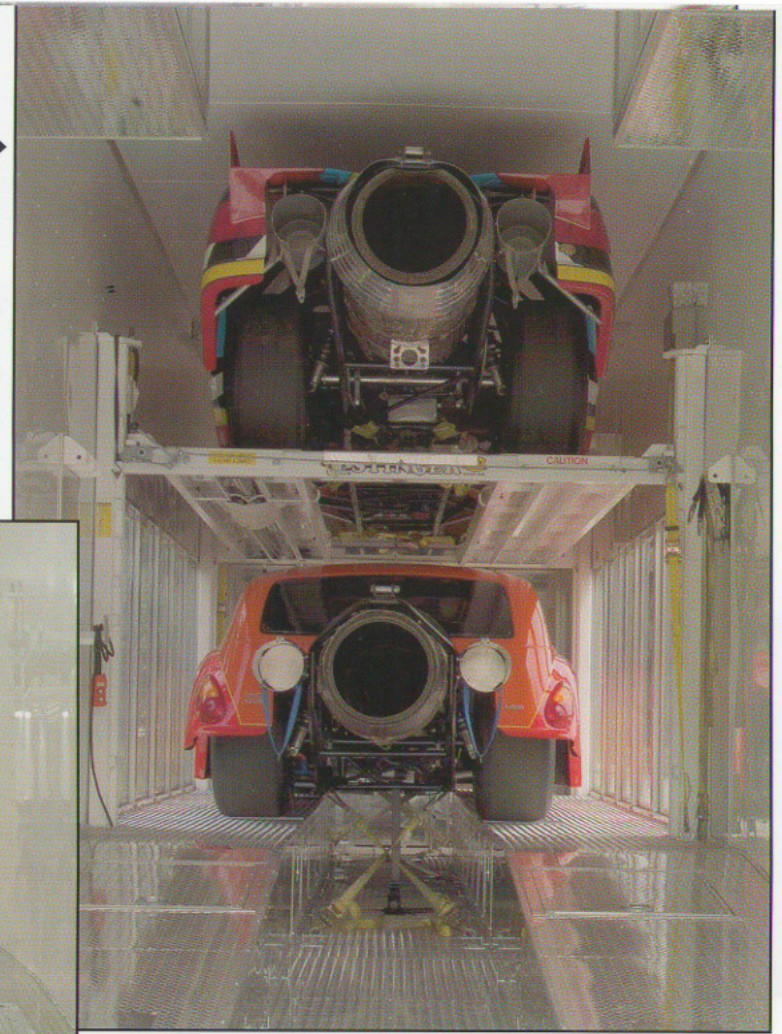

◀ Cast corners are
standard on all
Auto Master and Junior
Auto Master models.

◀ The interior of the 50 ft. car hauler trailer features wheel well cabinets, storage area, workbenches, lights, and unistrut track.

▶ The stacker lift system is shown with two custom race cars loaded in the travel position.

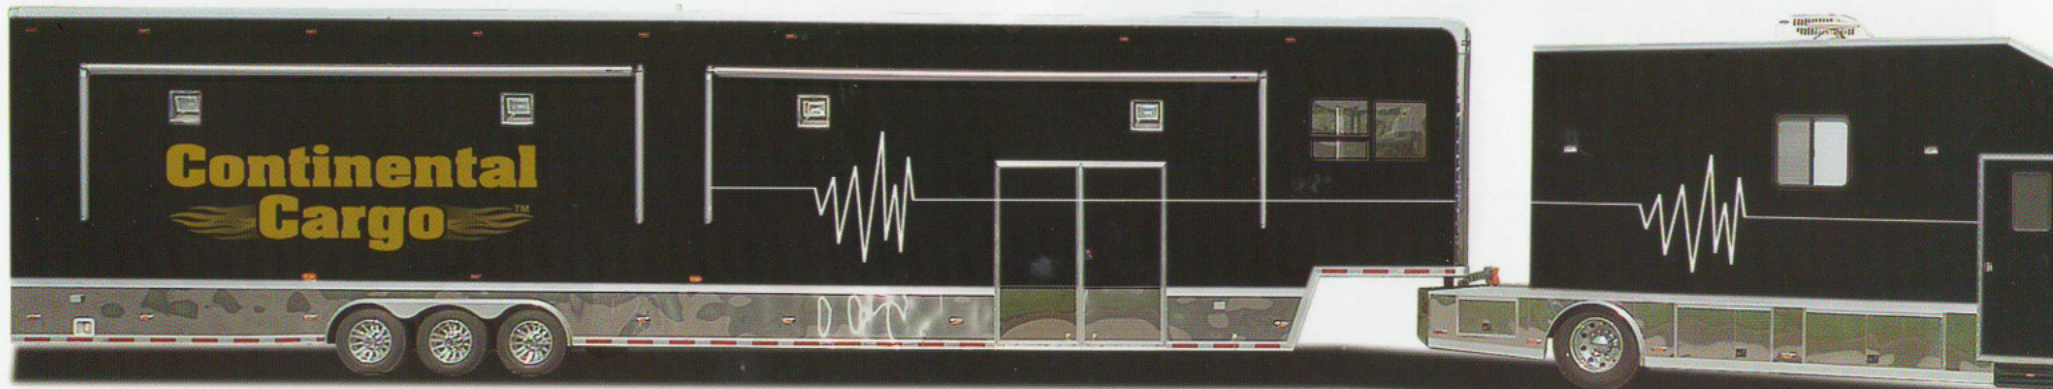

◀ Workbench and storage cabinets are shown with the stacker system installed. 12 volt and 110 volt lighting is available.

▲ Custom built car trailer with stacker lift system and aluminum tread plate ramp overs installed, shown in the down position.

▶ The stacker lift system in the up position. This lift is capable of lifting 4,000 lbs., thereby enabling a second car to be stowed in the lower position.
