## Continental Cargo™

*Stacker Trailers* by Continental Cargo let you take along more of the fun. These unique trailers have plenty of interior room for vehicles or equipment on the floor level and an ingenious lift system that stores additional vehicles overhead. Each trailer is custom designed to fit your needs.

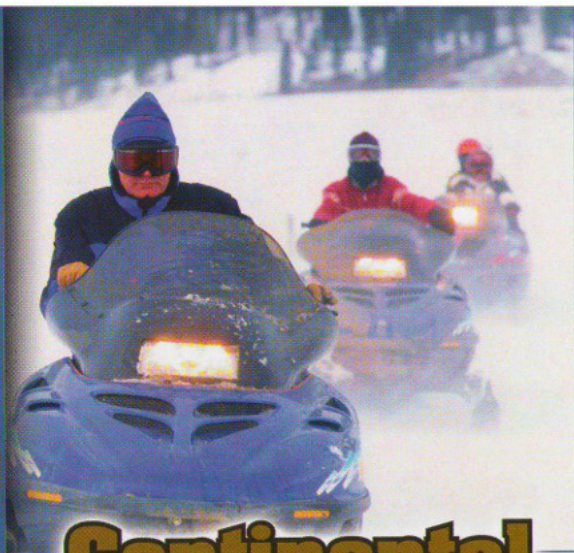

Whether you're hauling cars, motorcycles, all-terrain vehicles, snowmobiles, or other recreational equipment, a Stacker Trailer can be custom designed for your specific application. Stacker Trailers are available in tag, gooseneck, or fifth wheel models in various sizes and weight capacities.

This standard gooseneck model can be custom designed to the size, lifting capacity, and interior equipment you need. The photo above shows the lift system in the loading position while the upper left photo shows the lift system in the stowed position.

## Continental Cargo™

*This specialized* transporter is designed to accommodate several units with a roomy, interior work/repair area that includes custom installed cabinets, toolboxes, workbench, and other amenities. An exterior lift gate raises the vehicle to an upper level storage area. In the down position, it serves as a ramp to load units into the lower level work area while doors provide security and protection from the outside weather. In transit, the lift gate folds up to form an exterior door. Our ability to customize ensures a trailer that's perfectly adapted to your equipment, applications, and preferences. Most importantly, our Stacker Trailer is quality built to stand up to the rugged conditions of work and play.

The rear hydraulic lift gate is an excellent choice for anyone needing a reliable, easy-to-operate, and safe rear door lift. Its rugged, forgiving design withstands repetitive use and the tough conditions of the racing scene. A hand-held remote with twin position switch allows easy operation and helps maintain a level load. Premium steel construction, highest grade electrical components, and customized pump motors ensure years of dependable service. Unforgiving dirt track, drag, and motorcycle racers along with other motor sports hobbyists have used this proven lift for years.

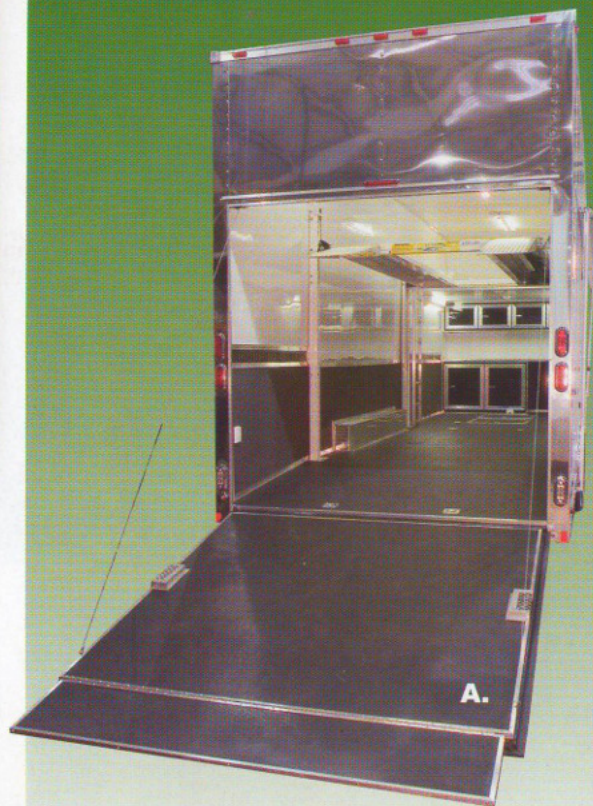

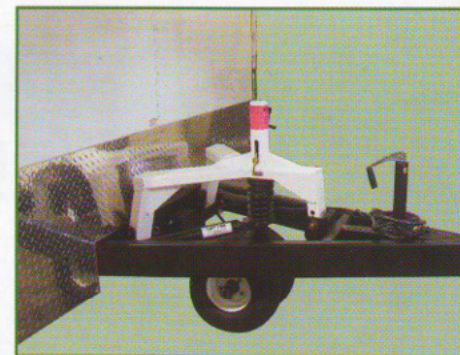

## Continental Cargo™

*The versatility* of our Stacker Trailers lets you haul more equipment without sacrificing interior space. In addition, our ability to customize ensures you'll have a trailer that's perfectly adapted to your equipment, applications, and personal preferences. Most importantly, our Stacker Trailer is quality built to stand up to the rugged conditions of work and play.

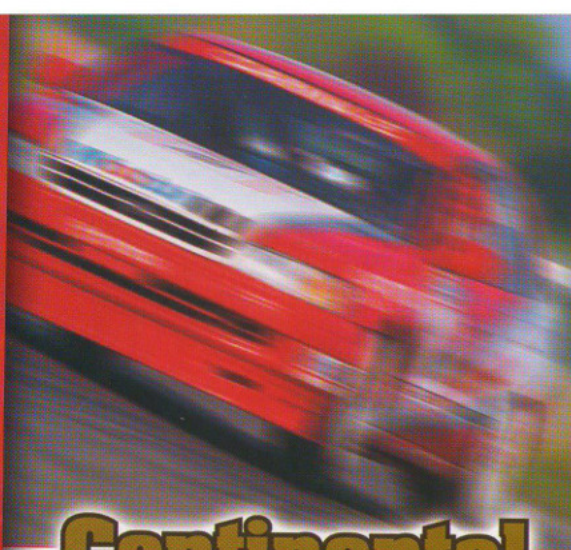

A. Lift system shown in the raised position. B. Lift system shown in the loading position.

An optional Tuff Tow System™ transfers weight off of the hitch for safer, easier towing. This system will handle up to 2,000# hitch weight.

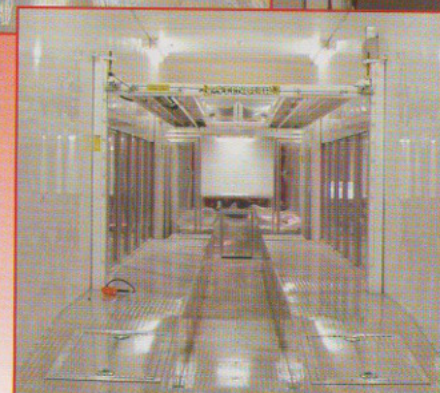

## Continental Cargo™

### Customized lift

specifications are available for a variety of applications. All lift systems meet OSHA/ANSI guidelines and are load tested up to 21,000 pounds with aircraft quality cables rated at 14,500 pounds each. Other features include durable power coat finish, pulley covers, 19-inch wide ramps made from 3/16-inch non-skid deck plate, 3-inch cylinder, sliders inside the column, machine rod end linkage, and single point release.

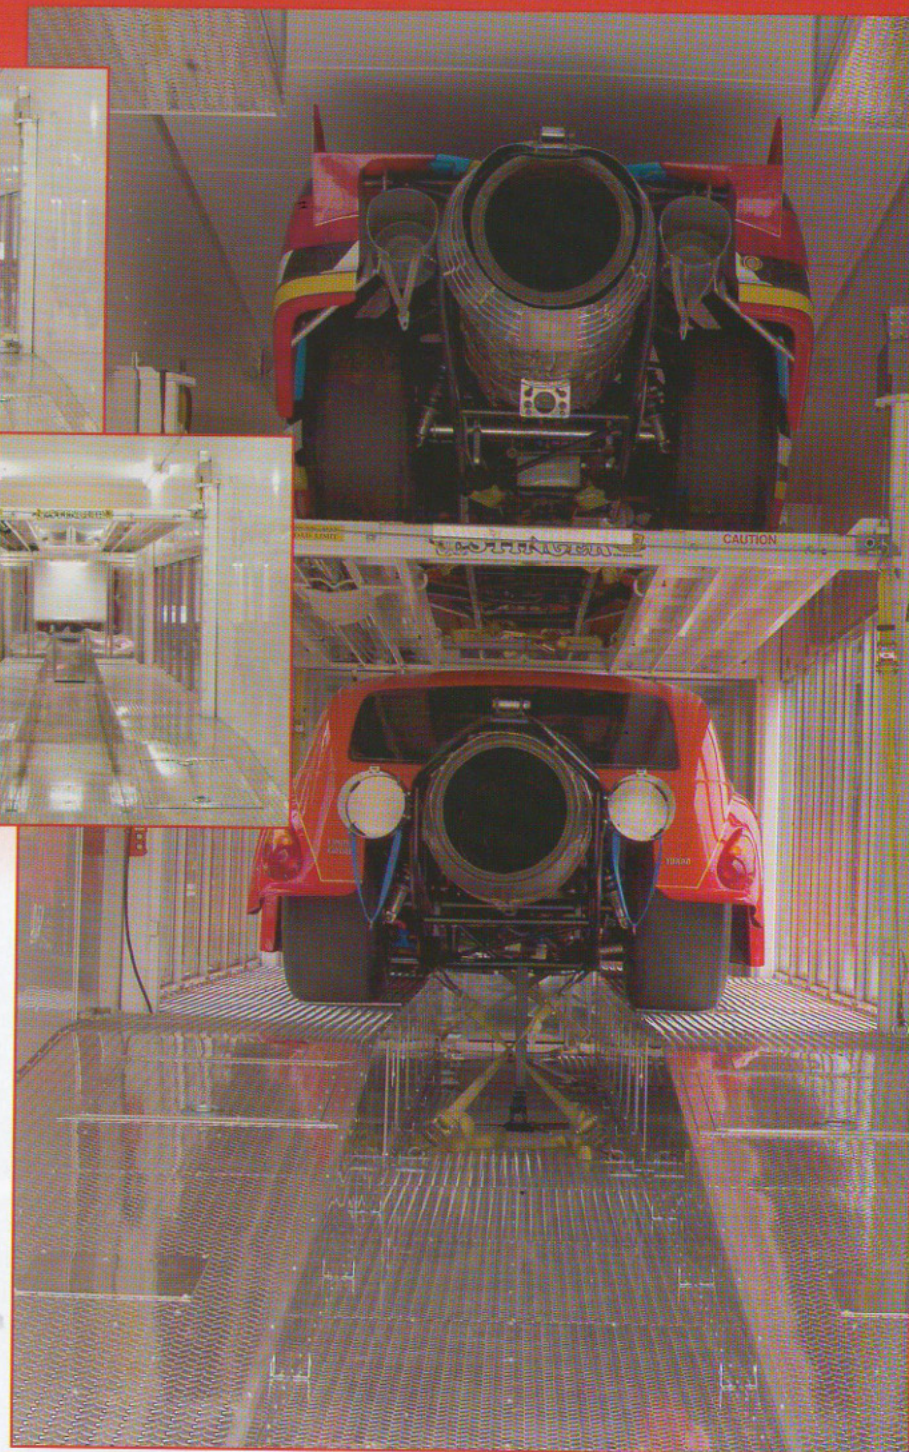

▲ Custom built car trailer with stacker lift system installed, shown in the down position.

The stacker lift ▲ system in the up position. This lift is capable of lifting 4,000 lbs., thereby enabling a second car to be stowed in the lower position.

The stacker lift ► system is shown with two custom race cars loaded in the travel position.
